

Role definition

Job title:	Senior Microsoft Dynamics CRM Developer
Reports to:	Business Systems Manager
Direct reports:	n/a
Location:	UK

Summary

A Senior CRM Developer who can provide the technical design and development of the groups Microsoft Dynamics CRM/D365CE platform as well as providing day to day support for the systems.

The role will be customer-facing so will require excellent communication skills as well as the ability to support and develop the CRM team.

Key objectives

- To lead on the high-quality development of the groups Dynamics CRM/D365CE environments
- Work with and lead the groups CRM development team with the design and implementation of new Dynamics CRM instances and continued enhancements to the existing environments within an Agile environment
- Lead on the day to day support of the CRM platforms, focussing on user accessibility, usability and stability of the systems
- Work with the end users to provide implementation design and translate into developed solutions

Principal responsibilities and accountabilities

- Technical design and development of the Microsoft Dynamics CRM platform
- Conversion of user requirements into estimated tasks
- Support and development of the CRM third party solutions
- Plugin development using the Microsoft .NET framework including SSIS and SSRS tools
- Contribute to the design and ongoing maintenance of the Dynamics CRM platform and the data
- Manage the integration between existing core business systems and the CRM
- Work closely with Business IT in understanding and interpreting the requirements of the business into working CRM solutions
- Experience managing development tasks and source code within VSTS
- Exposure to DevOps within VSTS
- Ensure appropriate levels of governance are applied at all times
- Application support & fault analysis
- Liaise closely with the wider IS Shared Service with regard to the provision of systems and supporting infrastructure
- Liaise with partner developers in designing solutions and supporting the systems
- Develop the skills of the CRM development and project team

Person specification

Qualifications and training

- Recent Microsoft Dynamics CRM Certification (MCP)
- Current programming certification or the ability to demonstrate a wide programming skill set within the .net framework
- Project management or analytical certification or training

Technical skills and experience
